APPENDIX 15  
TO COMPREHENSIVE REPORT  
DATED JUNE 1945

## FOREWORD

The bibliography contained herein is a reference to published articles on subject matter related to frost phenomena. Most of the publications listed have influenced the general development of laboratory and field procedures for frost investigations. Several of the articles are not in agreement with recent investigations, but are included as a record of previous studies.

The references prefixed with an asterisk (\*) are on file at the Frost Effects Laboratory, Boston District, U. S. Engineer Office, Boston, Massachusetts.
